MEDCLIC

THE MEDITERRANEAN IN ONE CLICK

Medcllic is a collaborative effort between "la Caixa" Foundation and ICTS SOCIB, with the aim of improving public knowledge about the Mediterranean Sea.

OBJETIVES

- Advancing scientific research about small-scale ocean variability and characterization of ocean climate.
- Creating innovative programs to bring marine science and society closer, specifically through educational activities to discover the Mediterranean Sea.

EXPLORE

On our website www.medcllic.es data from new technologies, observing the marine environment in real-time, are available for interactive public exploration.

ACTIVITIES

Medcllic provides multimedia resources to learn about the Mediterranean Sea, including educational programs and learning activities for students and their teachers.
